

# DON'T BECOME OBSOLETE. RISE TO THE OPPORTUNITY.

Microsoft is already winding down support for its mobile operating systems. And Verizon's 2G and 3G networks are phasing out, too. If your legacy devices are in danger, we have the solution.

## Are you impacted?

### Windows Embedded CE 6.0

Extended support end date:  
**April 10, 2018**

### Windows Embedded Handheld 6.5

Extended support end date:  
**January 14, 2020**

### Windows Embedded Compact 7

Extended support end date:  
**April 13, 2021**

### Verizon 3G

End date for new activations:  
**June 30, 2018**

### ALL Verizon LTE

Connectivity terminated:  
**January 2020**

## Don't just upgrade. **IMPROVE** with Honeywell Mobility Edge™

Honeywell's Mobility Edge™ can solve all these upgrade challenges. Through a partnership with Google, Mobility Edge™ can be updated to support the next four Android releases and is specially designed to handle updates through 2023.

## And that's just the beginning.

The Mobility Edge™ platform has the ability to be deployed across all facets of even the most complex business.

## THE ADVANTAGES?

### Efficiency

You can build and deploy apps just once and cover many devices.

### Flexibility

With multiple form factors in Honeywell's pipeline, workers will have the right tools for the job.

### Time savings

One round of testing and validation will cover multiple device types.

### Investment protection

Mobility Edge™ extends the life cycle of your devices by offering Android support through 2023.

## CHECK OUT THESE FEATURES:

- Easy setup
- Enterprise Termination Emulation
- Fast data capture
- Find My Device
- Hot-swappable battery capability
- Movable scan trigger
- Wireless tethering
